Dear Botanical Skin Works & Ada Cosmetics,

As owner/proprietor of a large medical, holistic and natural care practice, I am both cautious and selective in suggesting products to my patients. I can, without reservation, make such a recommendation with regard to both your mineral makeup and natural skincare items.

My patients frequently complain of easily irritated skin or problems such as acne, eczema, psoriasis, dry or oily skin. The clean, non-comedogenic mineral makeup, as well as the eczema lotion, natural soaps and many other effective skincare products offered by your firm have resulted in marked improvement and reduced discomfort in many such cases.

Thank you for bringing to the market products which are safe, effective, and therapeutic. This not only makes my job easier, but removes the stress of wondering how a sensitive patient might react to a product. I also feel that a contribution to the overall health of the planet is made when people remove toxic laden products from their lives.

Again, you have my wholehearted endorsement,

A handwritten signature in dark ink, appearing to read 'E. Hixon, MD'. The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
